

How Home Care Assistance *Can Help You*

Wealth Advisors

Clear and Consistent Communication: Our caregivers record detailed care notes on every shift to provide to your client's assigned Client Care Manager (CCM). If there are any changes in client condition, the CCM will communicate to you directly, and to any family members you have designated. Our CCM is available to you and your client 24/7 to handle caregiver personalized matching, training, updates in care needed or schedule, and responsibility for any caregiver issues should they arise.

Personalized Care and Lowered Liability: We provide a complimentary, in-home assessment to evaluate your client's wellness needs. We will create a personalized care plan that will align with your vision of care, while ensuring a positive client experience for the senior. Our caregivers are fingerprinted and background checked as well as licensed, bonded, and ensured through us.

Your Expert Resource: We are experts in helping seniors age in place. This includes understanding the cost of all long-term care services and collaborating with your expertise to educate clients on what path is most appropriate based on needs, wishes, and resources. We can also help identify risk factors that may prevent your client from aging in place.

Let us help support you and provide for your clients who need in-home care. **Call us today!**
